HOW TO USE

You have 2 ways to access the test

1. Open this URL **https://link.intergreat.com/RjPe8** on your computer
2. Use your mobile device to scan the QR code attached

Reading Passage 1

*You should spend about 20 minutes on **Questions 1 -13**, which are based on Reading Passage 1 below.*

Money Transfers by Mobile

A. The ping of a text message has never sounded so sweet. In what is being touted as a world first, Kenya's biggest mobile operator is allowing subscribers to send cash to other phone users by SMS. Known as M-Pesa, or mobile money, the service is expected to revolutionise banking in a country where more than 80% of people are excluded from the formal financial sector. Apart from transferring cash - a service much in demand among urban Kenyans supporting relatives in rural areas - customers of the Safaricom network will be able to keep up to 50,000 shillings (£370) in a "virtual account" on their handsets.

B. Developed by Vodafone, which holds a 35% share in Safaricom, M-Pesa was formally launched in Kenya two weeks ago. More than 10,000 people have signed up for the service, with around 8 million shillings transferred so far, mostly in tiny denominations. Safaricom's executives are confident that growth will be strong in Kenya, and later across Africa. "We are effectively giving people ATM cards without them ever having to open a real bank account," said Michael Joseph, chief executive of Safaricom, who called the money transfer concept the "next big thing" in mobile telephony.

C. M-Pesa's is simple. There is no need for a new handset or SIM card. To send money, you hand over the cash to a registered agent - typically a retailer - who credits your virtual account. You then send between 100 shillings (74p) and 35,000 shillings (£259) via text message to the desired recipient - even someone on a different mobile network - who cashes it at an agent by entering a secret code and

showing ID. A commission of up to 170 shillings (£1.25) is paid by the recipient but it compares favourably with fees levied by the major banks, whose services are too expensive for most of the population.

D. Mobile phone growth in Kenya, as in most of Africa, has been remarkable, even among the rural poor. In June 1999, Kenya had 15,000 mobile subscribers. Today, it has nearly 8 million out of a population of 35 million, and the two operators' networks are as extensive as the access to banks is limited. Safaricom says it is not so much competing with financial services companies as filling a void. In time, M-Pesa will allow people to borrow and repay money, and make purchases. Companies will be able to pay salaries directly into workers' phones - something that has already attracted the interest of larger employers, such as the tea companies, whose workers often have to be paid in cash as they do not have bank accounts. There are concerns about security, but Safaricom insists that even if someone's phone is stolen, the PIN system prevents unauthorised withdrawals. Mr. Joseph said the only danger is sending cash to the wrong mobile number and the recipient redeeming it straight away.

E. The project is being watched closely by mobile operators around the world as a way of targeting the multibillion pound international cash transfer industry long dominated by companies such as Western Union and Moneygram. Remittances sent from nearly 200 million migrant workers to developing countries totalled £102 billion last year, according to the World Bank. The GSM Association, which represents more than 700 mobile operators worldwide, believes this could quadruple by 2012 if transfers by SMS become the norm. Vodafone has entered a partnership with Citigroup that will soon allow Kenyans in the UK to send money home via text message. The charge for sending £50 is expected to be about £3, less than a third of what some traditional services charge.

Questions 1-4

*The text has 5 paragraphs (**A - E**).*

Which paragraph contains each of the following pieces of information?

1 [ ] A possible security problem

2 [ ] The cost of M-Pesa

3 [ ] An international service similar to M-Pesa

4 [ ] The fact that most Kenyans do not have a bank account

Questions 5-8

*Complete the following sentences using **NO MORE THAN THREE WORDS** from the text for each gap.*

Safaricom is the 5 _____ mobile phone company in Kenya.

An M-Pesa account needs to be credited by 6 _____

7 _____ companies are particularly interested in using M-Pesa.

Companies like Moneygram and Western Union have 8 _____ the international money transfer market.

Questions 9-13

Do the statements on the next page agree with the information given in Reading Passage 1?

*In boxes **9 - 13** on your answer sheet, write*

TRUE	if the statement agrees with the information
FALSE	if the statement contradicts the information
NOT GIVEN	If there is no information on this

9 [ ] Most Kenyans working in urban areas have relatives in rural areas.

10 [ ] So far, most of the people using M-Pesa have used it to send small amounts of money.

11 [ ] M-Pesa can only be used by people using one phone network.

12 [ ] M-Pesa can be used to buy products and services.

13 [ ] The GSM Association is a consumer organisation.

Reading Passage 2

*You should spend about 20 minutes on **Questions 14 - 26**, which are based on Reading Passage 2 below.*

Park the Car Permanently

A. More than a million people are likely to be disappointed by their experience of the Government's attempts to improve the democratic process. They may have signed an online petition against road pricing, but ministers are determined to push ahead with plans to make it more expensive to drive. The Government is convinced that this is the only way to reduce congestion and the environmental damage caused by motoring.

B. Why wait until you are forced off the road by costly charges? You may enjoy the convenience of your car, but the truth is that for huge numbers of people, owning a car makes little financial sense. You'd be far better off giving it up and relying on other forms of transport. "I'm 47 and I've never owned a car, despite having a job that requires me to travel all over the South-East to visit clients," says Donnachadh McCarthy, an environmental expert who specialises in advising people how to be greener. "A car is a huge financial commitment, as well as being a psychological addiction. Not owning a vehicle is far more practical than most people realise."

C. It may seem as if cars have never been cheaper. After all, it is now possible to buy a brand new car for less than £4,800 - the Perodua Kelisa, if you're interested. There are plenty of decent vehicles you can buy straight from the showroom for between £5,000 and £7,000. Of course, if you buy second-hand, the prices will be even lower. However, the falling purchase price of cars masks the fact that it has never been more expensive to own and run a vehicle. The estimate is that the cost of running a car rose by more than ten per cent last year alone. The annual cost of

running your own vehicle is pul at an average of £5,539, or £107 a week. While drivers who do less or more than the average mileage each year will spend correspondingly less or more, many of the costs of ear ownership are fixed - and therefore unavoidable.

D. Depreciation - the fact that your vehicle loses a large chunk of its resale value each year - is one problem, accounting for £2,420 a year. The cost of finance packages, which most people have to resort to to pay for at least part of the price of a new car, has also been rising - to an average of £1,040 a year. Then there's insurance, maintenance, tax, and breakdown insurance, all of which will cost you broadly the same amount, however many miles you do. Only fuel costs are truly variable. While petrol prices are the most visible indicator of the cost of running a car, for the typical driver they account for less than one fifth of the real costs each year. In other words, leaving aside all the practical and psychological barriers to giving up your car, in financial terms, doing so makes sense for many people.

E. Take the cost of public transport, for example. In London, the most expensive city in the UK, the most expensive annual travel card, allowing travel in any zone at any time, costs just over £1,700. You could give up your car and still have thousands of pounds to spare to spend on occasional car hire. In fact, assuming that you have the most expensive travel card in London, you could hire a cheap car from a company, such as easyCar for about 30 weeks a year, and still be better off overall than if you own your own vehicle. Not that car hire is necessarily the most cost-effective option for people who are prepared to do without a car but may still need to drive occasionally.

F. Streetcar, one of several "car clubs" with growing numbers of members, reckons that using its vehicles twice a week, every week, for a year, would cost you just £700. Streetcar's model works very similarly to those of its main rivals, Citycarclub and Whizzgo. These three companies, which now operate in 20 of Britain's towns and cities, charge their members a refundable deposit - £150 at Streetcar - and then provide them with an electronic smart card. This enables members to get into the vehicles, which are left parked in set locations, and the keys are then found in the glove compartment. Members pay an hourly rate for the car - £4.95 is the cost at Streetcar - and return it to the same spot, or to a different designated parking place.

G. Car sharing is an increasingly popular option for people making the same journeys regularly - to and from work, for example. Many companies run schemes that help colleagues who live near to each other and work in the same place to contact each other so they can share the journey to work. Liftshare and Carshare are two national organisations that maintain online databases of people who would be prepared to team up. Other people may be able to replace part or all of their

journey to work - or any journeys, for that matter - with low-cost transport such as a bicycle, or even by just walking. The more you can reduce your car use, however you gain access to it, the more you will save.

Questions 14-17

*The text has 7 paragraphs (**A - G**).*

Which paragraph does each of the following headings best fit?

14 [ ] Don't wait!

15 [ ] Team up

16 [ ] Join a club

17 [ ] Use public transport

Questions 18-22

*According to the text, **FIVE** of the following statements are true.*

*Write the corresponding letters in answer boxes **18 to 22** in any order.*

A ☐ McCarthy claims people can become addicted to using cars.

B ☐ The cost of using a car rose by over ten per cent last year.

C ☐ Most British people borrow money to help buy cars.

D ☐ Many people need cars to drive in London occasionally.

E ☐ Streetcar operates in over 20 cities in Britain.

F ☐ Streetcar’s cars must be left at specific locations.

G ☐ Car sharing is becoming more popular with people who live and work near each other.

H ☐ The government wants to encourage people to go to work on foot or by bicycle.

Questions 23-26

23

According to the information given in the text, choose the correct answer or answers from the choices given.

The government has decided

- **A** ☐ not to follow protestors' suggestions.
- **B** ☐ to become more democratic.
- **C** ☐ to go ahead with charging drivers to use roads.

24

Cars are often

- **A** ☐ relatively cheap in Britain.
- **B** ☐ relatively expensive to operate in Britain.
- **C** ☐ sold second-hand in Britain.

25

Fuel costs

- **A** ☐ make up about 20% of the cost of running a car.
- **B** ☐ are related to the amount drivers pay for their cars.
- **C** ☐ depend on how far you drive.

26

Using public transport

- **A** ☐ will save money for British motorists, except in London.
- **B** ☐ and renting a car part of the time can save money.
- **C** ☐ costs Londoners about £1,700 a year.

Reading Passage 3

*You should spend about 20 minutes on **Questions 27 - 40**, which are based on Reading Passage 3 below.*

Low-Cost Lamps Light Rural India

Until three months ago, life in this humble village without electricity would come to a halt after sunset. Inside his mud-and-clay home, Ganpat Jadhav's three children used to study in the dim, smoky glow of a kerosene lamp, when their monthly fuel quota of four litres dried up in just a fortnight, they had to strain their eyes using the light from a cooking fire. That all changed with the installation of low-cost, energy-efficient lamps that are powered entirely by the sun. The lights were installed by the Grameen Surya Bijli Foundation (GSBF), an Indian non-governmental organisation focused on bringing light to rural India. Some 100,000 Indian villages do not yet have electricity. The GSBF lamps use LEDs - light emitting diodes - that are four times more efficient than a normal bulb. After a $55 installation cost, solar energy lights the lamp free of charge. LED lighting, like cell phones, is another example of a technology whose low cost could allow the rural poor to leap into the 21st century.

As many as 1.5 billion people - nearly 80 million in India alone - light their houses using kerosene as the primary lighting media. The fuel is dangerous, dirty, and - despite being subsidised - consumes nearly four per cent of a typical rural Indian household’s budget. A recent report by the Intermediate Technology Development Group suggests that indoor air pollution from such lighting media results in 1.6 million deaths worldwide every year. LED lamps, or more specifically white LEDs, are believed to produce nearly 200 times more useful light than a kerosene lamp and almost 50 times the amount of useful light of a conventional bulb. "This technology can light an entire rural village with less energy than that used by a

single conventional 100-watt light bulb," says Dave Irvine-Halliday, a professor of electrical engineering at the University of Calgary, Canada and the founder of Light up the World Foundation (LUTW). Founded in 1997, LUTW has used LED technology to bring light to nearly 10,000 homes in remote and disadvantaged corners of some 27 countries like India, Nepal, Sri Lanka, Bolivia, and the Philippines.

The technology, which is not yet widely known in India, faces some scepticism here. "LED systems are revolutionising rural lighting, but this isn't a magic solution to the world's energy problems," says Ashok Jhunjhunwala, head of the electrical engineering department at the Indian Institute of Technology, Madras. In a scenario in which nearly 60 per cent of India's rural population uses 180 million tons of biomass per year for cooking via primitive wood stoves - which are smoky and provide only 10-15 per cent efficiency in cooking -Jhunjhunwala emphasises the need for a clean energy source, not just for lighting but for other domestic purposes as well. The Indian government in April launched an ambitious project to bring electricity to 112,000 rural villages in the next decade. However, the remote locations of the village will make reaching this goal difficult. A. K. Lakhina, the chairman of India's Rural Electrification Corporation, says the Indian government recognises the potential of LED lighting powered by solar technology, but expressed reservations about its high costs. "If only LEDs weren't imported but manufactured locally," he says, "and in bulk."

The lamps installed in nearly 300 homes by GSBF cost nearly half the price of other solar lighting systems. Jasjeet Singh Chaddha, the founder of the NGO, currently imports his LEDs from China. He wants to set up an LED manufacturing unit and a solar panel manufacturing unit in India. If manufactured locally, the cost of his LED lamp could plummet to $22, as they will not incur heavy import duties. "We need close to $5 million for this," he says. Mr. Chaddha says he has also asked the government to exempt the lamps from such duties, but to no avail. An entrepreneur who made his money in plastics, Chaddha, has poured his own money into the project, providing the initial installations free of charge. As he looks to make the project self-sustainable, he recognises that it is only urban markets -which have also shown an avid interest in LED lighting - that can pay. The rural markets in India cannot afford it, he says, until the prices are brought down. The rural markets would be able to afford it, says Mr. Irvine-Halliday, if they had access to microcredit. He says that in Tembisa, a shanty town in Johannesburg, he found that almost 10,000 homes spent more than $60 each on candles and paraffin every year. As calculations revealed, these families can afford to purchase a solid state lighting system in just over a year of paying per week what they would normally spend on candles and paraffin - if they have access to microcredit. LUTW is in the process of creating such a microcredit facility for South Africa.

In villages near Khadakwadi, the newly installed LED lamps are a subject of envy, even for those connected to the grid. Those connected to the grid have to face power cuts up to 6 or 7 hours a day. Constant energy shortages and blackouts are a common problem due to a lack of power plants, transmission, and distribution losses caused by old technology and illegal stealing of electricity from the grid. LED systems require far less maintenance, a longer life, and as villagers jokingly say, “no electricity bills”. The lamps provided by GSBF have enough power to provide just four hours of light a day. However, that is enough for people to get their work done in the early hours of the night, and is more reliable than light generated off India’s electrical grid. Villagers are educated by GSBF officials to make the most of the new lamps. An official from GSBF instructs Jadhav and his family to clean the lamp regularly. “Its luminosity and life will diminish if you let the dust settle on it,” he warns them.

Questions 27-30

*For each question, only **ONE** of the choices is correct.*

Write the corresponding letter in the appropriate box on your answer sheet.

27 The GSBF lamps

- **A** provide light for 100,000 Indian villages.
- **B** are very expensive to install.
- **C** are powered by the sun.

28 More than half of India’s population uses

- **A** kerosene as a cooking fuel.
- **B** biomass as a cooking fuel.
- **C** solar power as a cooking fuel.

29 In India, the GSBF lamps are too expensive for most people

- **A** in rural areas.
- **B** in urban areas.
- **C** in all areas.

30 The GSBF lamps

- **A** are not as reliable as electricity from the national power grid.
- **B** require skill to use.
- **C** only provide four hours of light a day.

Questions 31-35

*Complete the following sentences using **NO MORE THAN THREE WORDS** from the text for each gap.*

Another example of cheap technology helping poor people in the countryside is 31 _____

Kerosene lamps and conventional bulbs give off less 32 _____ than GSBF lamps.

It is unlikely that the Indian government will achieve its aim of connecting 112,000 villages to electricity because many villages are 33 _____

GSBF lamps would be cheaper if it weren't for 34 _____

Users need to wipe 35 _____ from the LED in order to keep it working well.

Questions 36-40

Do the following statements agree with the information given in Reading Passage 3?

*In boxes **36 - 40** on your answer sheet, write*

TRUE	if the statement agrees with the information
FALSE	if the statement contradicts the information
NOT GIVEN	If there is no information on this

36 [ ] Ganpat Jadhav's monthly ration of kerosene was insufficient.

37 [ ] Kerosene causes many fires in homes in developing countries.

38 [ ] LED systems could solve the world’s energy problems.

39 [ ] Chaddha has so far funded the GSBF lamp project himself.

40 [ ] Microcredit would help to get more people to use LED lamps.

Reading Passage 1

*You should spend about 20 minutes on **Questions 1 -13**, which are based on Reading Passage 1 below.*

Sleepy Students Perform Worse

A. Staying up an hour or two past bedtime makes it far harder for kids to learn, say scientists who deprived youngsters of sleep and tested whether their teachers could tell the difference. They could. If parents want their children to thrive academically, “Getting them to sleep on time is as important as getting them to school on time," said psychologist Gahan Fallone, who conducted the research at Brown Medical School.

B. The study, unveiled Thursday at an American Medical Association (AMA) science writers meeting, was conducted on healthy children who had no evidence of sleep- or learning-related disorders. Difficulty paying attention was among the problems the sleepy youngsters faced - raising the question of whether sleep deprivation could prove even worse for people with attention deficit hyperactivity disorder, or ADHD. Fallone now is studying that question, and suspects that sleep problems “could hit children with ADHD as a double whammy”.

C. Sleep experts have long warned that Americans of all ages do not get enough shuteye. Sleep is important for health, bringing a range of benefits that, as Shakespeare put it, “knits up the ravelled sleave of care”. Not getting enough is linked to a host of problems, from car crashes as drivers doze off to crippled memory and inhibited creativity. Exactly how much sleep correlates with school performance is hard to prove. So, Brown researchers set out to test whether teachers could detect problems with attention and learning when children stayed up late - even if the teachers had no idea how much sleep their students actually got.

D. They recruited seventy-four 6- to 12-year-olds from Rhode Island and southern Massachusetts for the three-week study. For one week, the youngsters went to bed and woke up at their usual times. They already were fairly good sleepers, getting nine to 9.5 hours of sleep a night. Another week, they were assigned to spend no fewer than ten hours in bed a night. The other week, they were kept up later than usual: First -and second-graders were in bed no more than eight hours and the older children no more than 6.5 hours. In addition to parents' reports, the youngsters wore motiondetecting wrist monitors to ensure compliance.

E. Teachers were not told how much the children slept or which week they stayed up late, but rated the students on a variety of performance measures each week. The teachers reported significantly more academic problems during the week of sleep deprivation, the study, which will be published in the journal Sleep in December, concluded. Students who got eight hours of sleep or less a night were more forgetful, had the most trouble learning new lessons, and had the most problems paying attention, reported Fallone, now at the Forest Institute of Professional Psychology.

F. Sleep has long been a concern of educators. Potter-Burns Elementary School sends notes to parents reminding them to make sure students get enough sleep prior to the school's yearly achievement testing. Another school considers it important enough to include in the school's monthly newsletters. Definitely, there is an impact on students' performance if they come to school tired. However, the findings may change physician practice, said Dr. Regina Benjamin, a family physician in Bayou La Batre, who reviewed the data at the Thursday's AMA meeting. "I don't ask about sleep" when evaluating academically struggling students, she noted. "I'm going to start."

G. So how much sleep do kids need? Recommended amounts range from about ten to eleven hours a night for young elementary students to 8.5 hours for teens. Fallone insists that his own second-grader get ten hours a night, even when it meant dropping soccer - season that practice did not start until 7:30 — too late for her to fit in dinner and time to wind down before she needed to be snoozing. "It's tough," he acknowledged, but "parents must believe in the importance of sleep."

Questions 1-4

*The text has 7 paragraphs (**A - G**).*

Which paragraph contains each of the following pieces of information?

1 [ ] Traffic accidents are sometimes caused by lack of sleep.

2 [ ] The number of children included in the study

3 [ ] How two schools are trying to deal with the problem

4 [ ] How the effect of having less sleep was measured

Questions 5-8

*Complete the following sentences using **NO MORE THAN TWO WORDS** from the text for each gap.*

Fallone is now studying the sleep patterns of children with 5 _____

The researchers used 6 _____ that show movement to check that children went to bed at the right time.

Students with less sleep had problems with memory, remembering new material, and 7 _____

Fallone admitted that it was 8 _____ for children to get enough sleep.

Questions 9-13

Do the following statements agree with the information given in Reading Passage 1?

*In boxes **9 - 13** on your answer sheet, write*

TRUE	if the statement agrees with the information
FALSE	if the statement contradicts the information
NOT GIVEN	If there is no information on this

9 [ ] The results of the study were first distributed to principals of American schools,

10 [ ] Some of the children in the study had previously shown signs of sleeping problems.

11 [ ] The study could influence how doctors deal with children's health problems.

12 [ ] Fallone does not let his daughter play soccer.

13 [ ] Staying up later is acceptable if the child is doing homework.

Reading Passage 2

*You should spend about 20 minutes on **Questions 14 - 26**, which are based on Reading Passage 2 below.*

The Brains Business

A. For those of a certain age and educational background, it is hard to think of higher education without thinking of ancient institutions. Some universities are of a venerable age - the University of bologna was founded in 1088, the University of Oxford in 1096 - and many of them have a strong sense of tradition. The truly old ones make the most of their pedigrees, and those of a more recent vintage work hard to create an aura of antiquity. Yet these tradition-loving (or -creating) institutions are currently enduring a thunderstorm of changes so fundamental that some say the very idea of the university is being challenged. Universities are experimenting with new ways of funding (most notably through student fees), forging partnerships with private companies and engaging in mergers and acquisitions. Such changes ate tugging at the ivy's toots.

B. This is happening for four reasons. The first is the democratisation of higher educa-tion - “massification". in the language of the educational profession. In the rich world, massification has been going on for some time. The proportion of adults with higher educational qualifications in developed countries almost doubled between l975 and 2000. From 22% to 41%. Most of the rich countries are still struggling to digest this huge growth in numbers. Now massification is spreading to the developing world. China doubled its student population in the late 1990s, and India is trying to follow suit.

C. The second reason is the rise of the knowledge economy. The world is in the grips of a “soft revolution” in which knowledge is replacing physical resources as

the main driver of economic growth. Between 1985 and 1997, the contribution of knowledge-based industries to total value added increased from 51% to 59% in Germany and from 45% to 51% in Britain. The best companies are now devoting at least a third of their investment to knowledge-intensive intangibles such as R&D, licensing, and marketing. Universities are among the most important engines of the knowledge economy. Not only do they produce the brain workers who man it, they also provide much of its backbone, from laboratories to libraries to computer networks.

D. The third factor is globalisation.. The death of distance is transforming academia just as radically as it is transforming business. The number of people from developed countries studying abroad has doubled over the past twenty years, to 1.9 million; universities are opening campuses all around the world; and a growing number of countries are trying to turn higher education into an export industry. The fourth is competition. Traditional universities are being forced to compete for students and research grants, and private companies are trying to break into a sector which they regard as “the new health care”. The World Bank calculates that global spending on higher education amounts to $300 billion a year, or 1 % of global economic output. There are more than 80 million students worldwide, and 3.5 million people are employed to teach them or look after them.

E. All this sounds as though a golden age for universities has arrived. However, inside academia, particularly in Europe, it. does not feel like it. Academics complain and administrators are locked in bad-tempered exchanges with the politicians who fund them. What has gone wrong? The biggest problem is the role of the state. If more and more governments are embracing massification, few of them are willing to draw the appropriate conclusion from their enthusiasm: that they should either provide the requisite hinds (as the Scandinavian countries do) or allow universities to charge realistic fees. Many governments have tried to square the circle through lighter management, but management cannot make up for lack of resources.

F. What, if anything can be done? Techno-utopians believe that higher education is ripe for revolution. The university, they say, is a hopelessly antiquated institution, wedded in outdated practices such as tenure and lectures, and incapable of serving a new world of mass audiences and just-in-time information. “Thirty wars from now the big university campuses will be relics," says Peter Drucker, a veteran management guru. "I consider the American research university of the past 40 years to be a failure." Fortunately, in his view, help is on the way in the form of Internet tuition and for-profit universities. Cultural conservatives, on the other hand, believe that the best way forward is backward. They think it is foolish to waste higher education on people who would rather study "Seinfeld" than Socrates, and disingenuous to contuse the pursuit of truth with the pursuit of profit.

Questions 14-17

*The text has 7 paragraphs (**A - F**).*

Which paragraph does each of the following headings best fit?

14 [ ] Education for the masses

15 [ ] Future possibilities

16 [ ] Globalisation and competition

17 [ ] Funding problem

Questions 18-22

*According to the text, **FIVE** of the following statements are true.*

*Write the corresponding letters in answer boxes **18 to 22** in any order.*

A ☐ Some universities are joining with each other.

B ☐ There are not enough graduates in developed countries.

C ☐ Most companies in developed countries devote a third of their profits to research and development.

D ☐ The number of people from developed countries studying outside their home countries has doubled in the last two decades.

E ☐ Scandinavian governments provide enough money for their universities.

F ☐ The largest university in the world is in Turkey.

G ☐ Italian students must have a five-minute interview with a professor before being accepted into university.

H ☐ Peter Drucker foresees the end of university campuses.

Questions 23-26

23

According to the information given in the text, choose the correct answer or answers from the choices given.

Universities are responding to changes by

A ☐ constructing new buildings in old styles so they appear old and traditional.

B ☐ introducing new subjects for study.

C ☐ charging students higher fees.

24

The knowledge economy is

A ☐ on the rise most of all in Germany.

B ☐ not fully appreciated in Britain.

C ☐ heavily reliant on universities.

25

Current problems at universities, especially in Europe, include

A ☐ managers arguing with governments.

B ☐ problems with funding.

C ☐ poor management.

26

Possible solutions put forward by reformists and conservatives include

A ☐ greater use of technology.

B ☐ employing management gurus to teach.

C ☐ teaching fewer students.

Reading Passage 3

*You should spend about 20 minutes on **Questions 27 - 40**, which are based on Reading Passage 3 below.*

Sunday Is a Fun Day for Modern Brits

In a new study, Essex University sociologists have dissected the typical British Sunday, and found we get up later and do fewer chores than we did 40 years ago - and we are far more likely to be out shopping or enjoying ourselves than cooking Sunday lunch. Academics at the university's Institute of Social and Economic Research asked 10,000 people to keep a detailed diary of how they spent Sundays in 2001. Then they compared the results with 3,500 diaries written in 1961, a treasure trove of information that had been uncovered 'in two egg boxes and a tea chest' in the basement of the BBC by ISER's director, Professor Jonathan Gershuny.

The contrast between the two periods could not be more striking. Forty years ago, Sunday mornings were a flurry of activity as men and women - especially women - caught up on their weekly chores and cooked up a storm in the kitchen. Women rarely allowed themselves any 'leisure' until the afternoon, after the dishes were cleaned. In 1961, more than a fifth of all men and women in Britain were sitting at a table by 2 p.m., most likely tucking into a roast with all the trimmings. Then there would be another rush to the table between 5 p.m. and 6 p.m. for high tea.

Since the arrival of brunch, the gastropub and the all-you-can-eat Sunday buffet at the local curry house, such institutions have become extinct. Today, we graze the entire day. You only have two free days a week. You don't want to have to waste one because there is nothing to do but watch TV. Sunday has leapfrogged Saturday in the fun stakes. On Saturdays, you are recovering from the week. Sundays are the last bastion of the weekend - you want to get as much as you can out of the day

before you have to go back to work.

According to researchers, the ability to trail around B&Q has made the most dramatic difference to our Sundays. In 1961, adults spent an average of 20 minutes a day shopping; by 2001, it was 50 minutes. ‘Shopping used to be a gender segregated activity that would take place during the week, while the husband was at work. Now it’s as much men as women,’ said Gershuny. We’re all more likely to be relaxing or shopping on a Sunday morning these days than scrubbing the floor or putting up shelves. ‘Men now stay in bed longer, and get up not, as previously, to work around the house, but rather to shop or to pursue other outside leisure activities.’

Men do about the same amount of unpaid work around the house as they used to on a Sunday, but it’s spread throughout the whole day, instead of crammed into the morning. Women do considerably less than 40 years ago. Indeed, men and women were ‘pretty much different species’ in 1961, as far as the way they spent Sundays was concerned, with men far more likely to be out of the house - at the pub or playing football - before lunch. ‘For women, leisure happened only in the afternoon. But by 2001, the shapes of men’s and women’s Sundays were much more similar,’ says the report.

‘Sunday for me is all about holding on to the weekend and trying to stave off Monday. An ideal Sunday would involve getting up and having a nice lunch. Sometimes we cook, but more often I go out to get a roast or bangers and mash at a gastropub. If it is a nice day, there is nothing better than sitting outside in the beer garden, reading the Sunday papers - one tabloid and one broadsheet - with a Guinness, extra cold. Sunday is often a chance to visit other parts of London, as long as it is not too far. I use Sundays to go clothes shopping, or to the cinema. I often go to Camden market, as I love the international foods on offer and hunting for bargains and vintage clothes.’

Jonathan Bentley Atchison (25, Clapham, London, works in communications)

‘I am usually at home making the Sunday lunch. Some friends go out to eat, but my husband Mark loves a roast, so we don’t. After that, I do the washing, like every day, and then I take my daughter Grace to netball and watch her play. Mark potters around - last Sunday, he tidied the garage. He works six days a week, so on Sunday he stays at home. I don’t like shopping on a Sunday because every man and his dog is out. I don’t work, so I can do it in the week. I tend to watch television and chill out. When summer comes, we go to barbecues at family or friends’ houses. When I was growing up, my dad would do the gardening and paint the fences while my mum would do housework.’

Hazel Hallows (42, Manchester, housewife, married with three children)

'When we were at home, I would get out in the garden, and my late wife Rose would cook the Sunday lunch and do the housework. I was an engineer, and Rose worked full-time as a supermarket manageress. In 1961, we had just moved to Bristol, and I spent Sunday maintaining the new house. The washing and ironing had to be done - it was a working-together atmosphere. We would sometimes go and spend the day with Rose's sister or other relatives. In 1961, it was the first time I had a new car, so we spent time in the countryside or garden centres. Now, I get up on Sundays and spend a couple of hours reading the newspapers.'

Bryan Jones (79, pensioner, Frampton Cotterell, near Bristol)

Questions 27-30

*For each question, only **ONE** of the choices is correct.*

Write the corresponding letter in the appropriate box on your answer sheet.

27 According to the diaries, in 1961, women rarely had free time on Sunday

- **A** ○ mornings.
- **B** ○ afternoons.
- **C** ○ evenings.

28 People want to do more on Sundays because

- **A** ○ more shops are open.
- **B** ○ it is a good day to graze.
- **C** ○ they are tired on Saturdays.

29 Shopping habits have changed since 1961 in that

- **A** ○ people shop less at weekends.
- **B** ○ men shop more than women.
- **C** ○ men do as much shopping as women.

30 Compared with 1961,

A ○ women do far less housework on Sundays.

B ○ men do far less housework on Sundays.

C ○ men and women do far less housework on Sundays.

Questions 31-35

*Complete the following sentences using **NO MORE THAN THREE WORDS** from the text for each gap.*

Professor Gershuny discovered thousands of 31 _____ at the BBC.

In 1961, people ate 32 _____ at 5 or 6 o'clock.

In 2001, people spent 33 _____ 50 minutes on shopping on Sundays.

Shopping is something that is not as 34 _____ as it was in 1961.

In 1961, men would often go for a drink or be 35 _____ before lunch.

Questions 36-40

Do the following statements agree with the information given in Reading Passage 3?

*In boxes **36 - 40** on your answer sheet, write*

TRUE	if the statement agrees with the information
FALSE	if the statement contradicts the information
NOT GIVEN	If there is no information on this

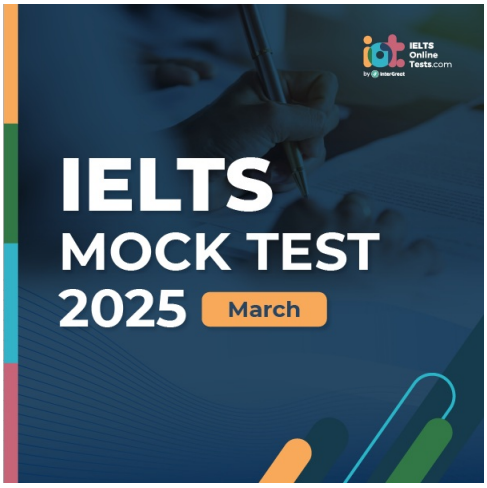

36 [▼] Mr. Atchison usually eats out.

37 [▼] Mrs. Hallows' husband does no household chores on Sundays.

38 [▼] Mrs. Hallows thinks the shops are too busy on Sundays.

39 [▼] Mr. Jones is a widower.

40 [▼] Mr. Jones does household chores on Sundays.

READING PASSAGE 1

Read the text below and answer ***Questions 1-13.***

Daydreaming

Everyone daydreams sometimes. We sit or lie down, close our eyes and use our imagination to think about something that might happen in the future or could have happened in the past. Most daydreaming is pleasant. We would like the daydream to happen and we would be very happy if it did actually happen. We might daydream that we are in another person's place, or doing something that we have always wanted to do, or that other people like or admire us much more than they normally do.

Daydreams are not dreams, because we can only daydream if we are awake. Also, we choose what our daydreams will be about, which we cannot usually do with dreams. With many daydreams, we know that what we imagine is unlikely to happen. At least, if it does happen, it probably will not do so in the way we want it to. However, some daydreams are about things that are likely to happen. With these, our daydreams often help us to work out what we want to do, or how to do it to get the best results. So, these daydreams are helpful. We use our imagination to help us understand the world and other people.

Daydreams can help people to be creative. People in creative or artistic careers, such as composers, novelists and filmmakers, develop new ideas through daydreaming. This is also true of research scientists and mathematicians. In fact, Albert Einstein said that imagination is more important than knowledge because knowledge is limited whereas imagination is not.

Research in the 1980s showed that most daydreams are about ordinary, everyday events. It also showed that over 75% of workers in so-called 'boring jobs', such as

lorry drivers and security guards, spend a lot of time daydreaming in order to make their time at work more interesting. Recent research has also shown that daydreaming has a positive effect on the brain. Experiments with MRI brain scans show that the parts of the brain linked with complex problem-solving are more active during daydreaming. Researchers conclude that daydreaming is an activity in which the brain consolidates learning. In this respect, daydreaming is the same as dreaming during sleep.

Although there do seem to be many advantages with daydreaming, in many cultures it is considered a bad thing to do. One reason for this is that when you are daydreaming, you are not working. In the 19th century, for example, people who daydreamed a lot were judged to be lazy. This happened in particular when people started working in factories on assembly lines. When you work on an assembly line, all you do is one small task again and again, every time exactly the same. It is rather repetitive and, obviously, you cannot be creative. So many people decided that there was no benefit in daydreaming.

Other people have said that daydreaming leads to 'escapism' and that this is not healthy, either. Escapist people spend a lot of time living in a dream world in which they are successful and popular, instead of trying to deal with the problems they face in the real world. Such people often seem to be unhappy and are unable or unwilling to improve their daily lives. Indeed, recent studies show that people who often daydream have fewer close friends than other people. In fact, they often do not have any close friends at all.

Questions 1-8

Do the following statements agree with the information given in the text?

*For questions **1-8**, write*

TRUE	if the statement agrees with the information
FALSE	if the statement contradicts the information
NOT GIVEN	If there is no information on this

1 [ ] People usually daydream when they are walking around.

2 [ ] Some people can daydream when they are asleep.

3 [ ] Some daydreams help us to be more successful in our lives.

4 [ ] Most lorry drivers daydream in their jobs to make them

more interesting.

5 [ ] Factory workers daydream more than lorry drivers.

6 [ ] Daydreaming helps people to be creative.

7 [ ] Old people daydream more than young people.

8 [ ] Escapist people are generally very happy.

Questions 9-10

Complete the sentences below.

*Choose **NO MORE THAN THREE WORDS** from the text for each answer.*

Writers, artists and other creative people use daydreaming to 9 _____

The areas of the brain used in daydreaming are also used for complicated 10 _____

Questions 11-13

*Choose the correct letter, **A, B, C** or **D**.*

11 Daydreams are

- **A** ○ dreams that we have when we fall asleep in daytime.
- **B** ○ about things that happened that make us sad.
- **C** ○ often about things that we would like to happen.
- **D** ○ activities that only a few people are able to do.

12 In the nineteenth century, many people believed that daydreaming was

- **A** ○ helpful in factory work.
- **B** ○ a way of avoiding work.
- **C** ○ something that few people did.
- **D** ○ a healthy activity.

13 People who daydream a lot

A usually have creative jobs.

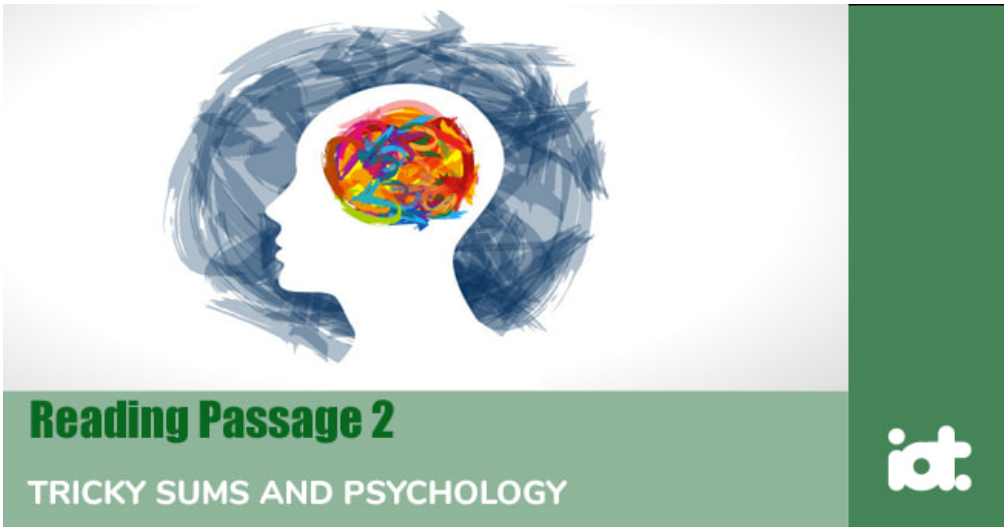

B are much happier than other people.

C are less intelligent than other people.

D do not have as many friends as other people.

READING PASSAGE 2

Read the text below and answer ***Questions 14-25.***

TRICKY SUMS AND PSYCHOLOGY

A. In their first years of studying mathematics at school, children all over the world usually have to learn the times table, also known as the multiplication table, which shows what you get when you multiply numbers together. Children have traditionally learned their times table by going from '1 times 1 is 1' all the way up to '12 times 12 is 144'.

B. Times tables have been around for a very long time now. The oldest known tables using base 10 numbers, the base that is now used everywhere in the world, are written on bamboo strips dating from 305 BC, found in China. However, in many European cultures the times table is named after the Ancient Greek mathematician and philosopher Pythagoras (570-495 BC). And so it is called the Table of Pythagoras in many languages, including French and Italian.

C. In 1820, in his book The Philosophy of Arithmetic, the mathematician John Leslie recommended that young pupils memories the times table up to 25 x 25. Nowadays, however, educators generally believe it is important for children to memorise the table up to 9 x 9, 10 x 10 or 12 x12.

D. The current aim in the UK is for school pupils to know all their times tables up to 12 x 12 by the age of nine. However, many people do not know them, even as adults. Recently, some politicians have been asked arithmetical questions of this kind. For example, in 1998, the schools minister Stephen Byers was asked the answer to 7 x 8. He got the answer wrong, saying 54 rather than 56, and everyone laughed at him.

E. In 2014, a young boy asked the UK Chancellor George Osborne the exact same

question. As he had passed A-level maths and was in charge of the UK's economic policies at the time, you would expect him to know the answer. However, he simply said, 'I've made it a rule in life not to answer such questions.'

F. Why would a politician refuse to answer such a question? It is certainly true that some sums are much harder than others. Research has shown that learning and remembering sums involving 6,7,8 and 9 tends to be harder than remembering sums involving other numbers. And it is even harder when 6,7,8 and 9 are multiplied by each other. Studies often find that the hardest sum is 6x8, with 7x8 not far behind. However, even though 7x8 is a relatively difficult sum, it is unlikely that George Osborne did not know the answer. So there must be some other reason why he refused to answer the question.

G. The answer is that Osborne was being 'put on the spot' and he didn't like it. It is well known that when there is a lot of pressure to do something right, people often have difficulty doing something that they normally find easy. When you put someone on the spot and ask such a question, it causes stress. The person's heart beats faster and their adrenalin levels go up. As a result, people will often make mistakes that they would not normally make. This is called 'choking'. Choking often happens in sport, such as when a footballer takes a crucial penalty. In the same way, the boy's question put Osborne under great pressure. He knew it would be a disaster for him if he got the answer to such a simple question wrong and feared that he might choke. And that is why he refused to answer the question.

Questions 14-19

The text has seven paragraphs, ***A-G****.*

Which paragraph contains the following information?

Write the correct letter, ***A-G****, next to questions* ***14-19.***

14 [ ] a 19th-century opinion of what children should learn

15 [ ] the most difficult sums

16 [ ] the effect of pressure on doing something

17 [ ] how children learn the times table

18 [ ] a politician who got a sum wrong

19 [ ] a history of the times table

Questions 20-25

Do the following statements agree with the information given in the text?

*For questions **20-25**, write*

TRUE	if the statement agrees with the information
FALSE	if the statement contradicts the information
NOT GIVEN	If there is no information on this

20 [ ] Pythagoras invented the times table in China.

21 [ ] Stephen Byers and George Osborne were asked the same question.

22 [ ] All children in the UK have to learn the multiplication table.

23 [ ] George Osborne did not know the answer to 7 X 8.

24 [ ] 7 X 8 is the hardest sum that children have to learn.

25 [ ] Stephen Byers got the sum wrong because he choked.

READING PASSAGE 3

Read the text below and answer ***Questions 26-40.***

Care in the Community

'Bedlam' is a word that has become synonymous in the English language with chaos and disorder. The term itself derives from the shortened name for a former 16th century London institution for the mentally ill, known as St. Mary of Bethlehem. This institution was so notorious that its name was to become a byword for mayhem. Patient 'treatment' amounted to little more than legitimised abuse. Inmates were beaten and forced to live in unsanitary conditions, whilst others were placed on display to a curious public as a side-show. There is little indication to suggest that other institutions founded at around the same time in other European countries were much better.

Even up until the mid-twentieth century, institutions for the mentally ill were regarded as being more places of isolation and punishment than healing and solace. In popular literature of the Victorian era that reflected true-life events, individuals were frequently sent to the 'madhouse' as a legal means of permanently disposing of an unwanted heir or spouse. Later, in the mid-twentieth century, institutes for the mentally ill regularly carried out invasive brain surgery known as a 'lobotomy' on violent patients without their consent. The aim was to 'calm' the patient but ended up producing a patient that was little more than a zombie. Such a procedure is well documented to devastating effect in the film 'One Flew Over the Cuckoo's Nest'. Little wonder then that the appalling catalogue of treatment of the mentally ill led to a call for change from social activists and psychologists alike.

Improvements began to be seen in institutions from the mid-50s onwards, along with the introduction of care in the community for less severely ill patients.

Community care was seen as a more humane and purposeful approach to dealing with the mentally ill. Whereas institutionalised patients lived out their existence in confinement, forced to obey institutional regulations, patients in the community were free to live a relatively independent life. The patient was never left purely to their own devices as a variety of services could theoretically be accessed by the individual. In its early stages, however, community care consisted primarily of help from the patient's extended family network. In more recent years, such care has extended to the provision of specialist community mental health teams (CMHTs) in the UK. Such teams cover a wide range of services from rehabilitation to home treatment and assessment. In addition, psychiatric nurses are on hand to administer prescription medication and give injections. The patient is therefore provided with the necessary help that they need to survive in the everyday world whilst maintaining a degree of autonomy.

Often, though, when a policy is put into practice, its failings become apparent. This is true for the policy of care in the community. Whilst back-up services may exist, an individual may not call upon them when needed, due to reluctance or inability to assess their own condition. As a result, such an individual may be alone during a critical phase of their illness, which could lead them to self-harm or even become a threat to other members of their community. Whilst this might be an extreme-case scenario, there is also the issue of social alienation that needs to be considered. Integration into the community may not be sufficient to allow the individual to find work, leading to poverty and isolation. Social exclusion could then cause a relapse as the individual is left to battle mental health problems alone. The solution, therefore, is to ensure that the patient is always in touch with professional helpers and not left alone to fend for themselves. It should always be remembered that whilst you can take the patient out of the institution, you can't take the institution out of the patient.

When questioned about care in the community, there seems to be a division of opinion amongst members of the public and within the mental healthcare profession itself. Dr. Mayalla, practising clinical psychologist, is inclined to believe that whilst certain patients may benefit from care in the community, the scheme isn't for everyone. 'Those suffering moderate cases of mental illness stand to gain more from care in the community than those with more pronounced mental illness. I don't think it's a one-size-fits-all policy. But I also think that there is a far better infrastructure of helpers and social workers in place now than previously and the scheme stands a greater chance of success than in the past.'

Anita Brown, mother of three, takes a different view. 'As a mother, I'm very protective towards my children. As a result, I would not put my support behind any scheme that I felt might put my children in danger... I guess there must be

assessment methods in place to ensure that dangerous individuals are not let loose amongst the public but I'm not for it at all. I like to feel secure where I live, but more to the point, that my children are not under any threat.'

Bob Ratchett, a former mental health nurse, takes a more positive view on community care projects. 'Having worked in the field myself, I've seen how a patient can benefit from living an independent life, away from an institution. Obviously, only individuals well on their way to recovery would be suitable for consideration as participants in such a scheme. If you think about it, is it really fair to condemn an individual to a lifetime in an institution when they could be living a fairly fulfilled and independent life outside the institution?'

Questions 26-31

Choose the correct letter, ***A, B, C*** *or* ***D.***

26 Which of the following statements is accurate?

A In the 20th century, illegal surgical procedures were carried out on the mentally ill.

B The Victorian era saw an increase in mental illness amongst married couples.

C Mental institutions of the past were better-equipped for dealing with the mentally ill.

D In the past, others often benefitted when a patient was sent to a mental asylum.

27 What does the writer mean by patient treatment being 'legitimised abuse'?

A There were proper guidelines for the punishment of mentally ill patients.

B Maltreatment of mentally ill patients was not illegal and so was tolerated.

C Only those who were legally entitled to do so could punish mentally ill patients.

D Physical abuse of mentally ill patients was a legal requirement of mental institutions.

28 What brought about changes in the treatment of mentally ill patients?

A ○ A radio documentary exposed patient maltreatment.

B ○ People rebelled against the consistent abuse of mentally ill patients.

C ○ Previous treatments of mentally ill patients were proved to be ineffective.

D ○ The maltreatment of mentally ill patients could never be revealed.

29 What was a feature of early care in the community schemes?

A ○ Patient support was the responsibility more of relatives than professionals.

B ○ Advanced professional help was available to patients.

C ○ All mentally ill patients could benefit from the scheme.

D ○ Patients were allowed to enjoy full independence.

30 What is true of care in the community schemes today?

A ○ They permit greater patient autonomy.

B ○ More professional services are available to patients.

C ○ Family support networks have become unnecessary.

D ○ All patients can now become part of these schemes.

31 What can be said of the writer's attitude towards care in the community?

A ○ He believes that the scheme has proved to be a failure.

B ○ He believes that it can only work under certain circumstances.

C ○ He believes that it will never work as mentally ill patients will always be disadvantaged.

D ○ He believes it has failed due to patient neglect by professional helpers.

Questions 32-36

*Look at the following statements, **32-36**, and the list of people, **A-C**.*

Match each statement to the correct person.

A	Dr. Mayalla
B	Anita Brown
C	Bob Ratchett

32 [ ] This person acknowledges certain inadequacies in the concept of care in the community, but recognises that attempts have been made to improve on existing schemes.

33 [ ] This person whilst emphasising the benefits to the patient from care in the community schemes is critical of traditional care methods.

34 [ ] This person's views have been moderated by their professional contact with the mentally ill.

35 [ ] This person places the welfare of others above that of the mentally ill.

36 [ ] This person acknowledges that a mistrust of care in the community schemes may be unfounded.

Questions 37-40

Do the following statements agree with the information given in the text?

*For questions **37-40**, write*

TRUE	if the statement agrees with the information
FALSE	if the statement contradicts the information
NOT GIVEN	If there is no information on this

37 [ ] There is a better understanding of the dynamics of mental illness today.

38 [ ] Community care schemes do not provide adequate

psychological support for patients.

39 [ ] Dr. Mayalla believes that the scheme is less successful than in the past.

40 [ ] The goal of community care schemes is to make patients less dependent on the system.

Write **NO MORE THAN THREE WORDS OR A NUMBER** for each answer.

School Excursion

Day: Wednesday (Example)

Destination: 1 _____

Weather: 2 _____

Arrival time: 3 _____

Activities Planned See: 4 _____

Eat: Catered lunch

Attend: 5 _____

Return time: 6 _____

Questions 7-10

Complete the table. Write **ONE WORD ONLY** for each answer.

Nationality	%
7 _____	26
8 _____	25
9 _____	16
Indonesian	15
10 _____	8
Saudi	7
Other	3

Questions 11-15

Choose the correct letter, **A**, **B**, or **C**.

11 The company deals mostly with:

A ○ Big cities

B Nature holidays.

C Nepal.

12 The overseas consultants deal mostly with:

A Asia

B North America

C Europe

13 For deserts and gorges, customers should come in the:

A Morning.

B Afternoon.

C Night.

14 Trips to regional locations are good because:

A The buses are comfortable.

B There is storage for suitcases.

C They can be seen quickly.

15 SleekLine buses are particularly known for their:

A Service.

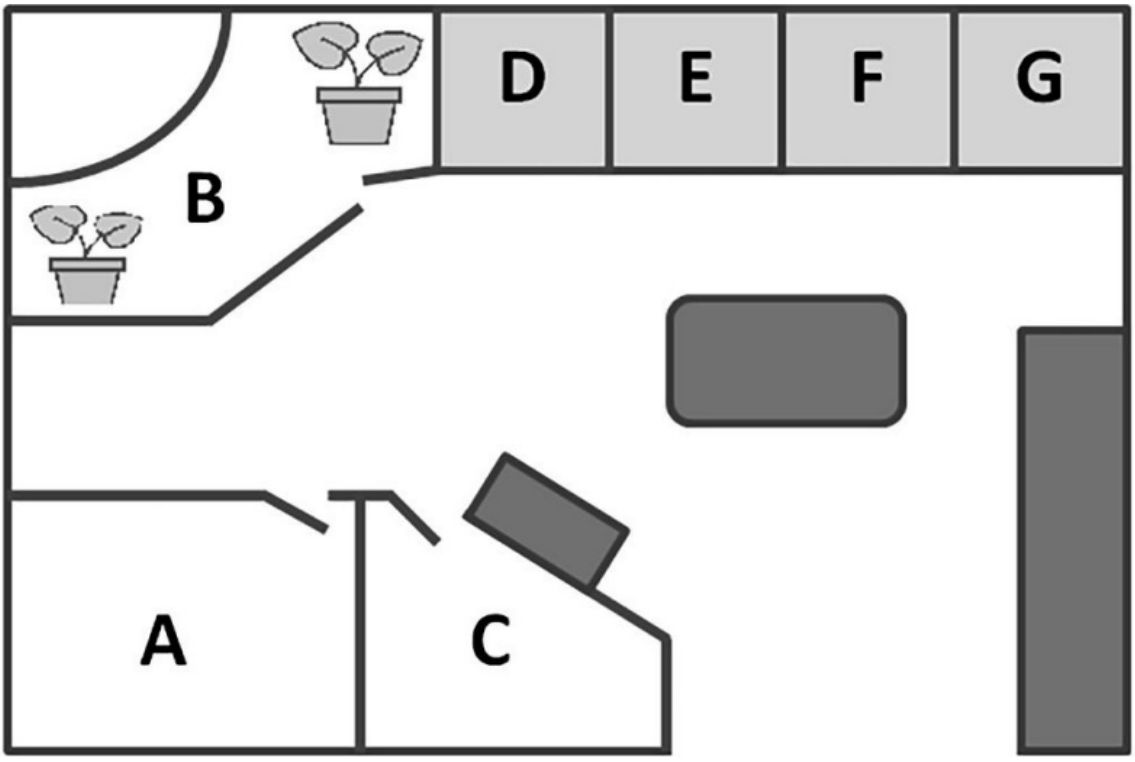

B Size.

C Comfort.

Questions 16-20

Identify the rooms in the office plan.

Write the correct letter, **A-G**, next to the questions.

16 [ ] Local Tours

17 [ ] Interstate Tours

18 [ ] International Tours

19 [ ] Asian Region

20 [ ] General Office

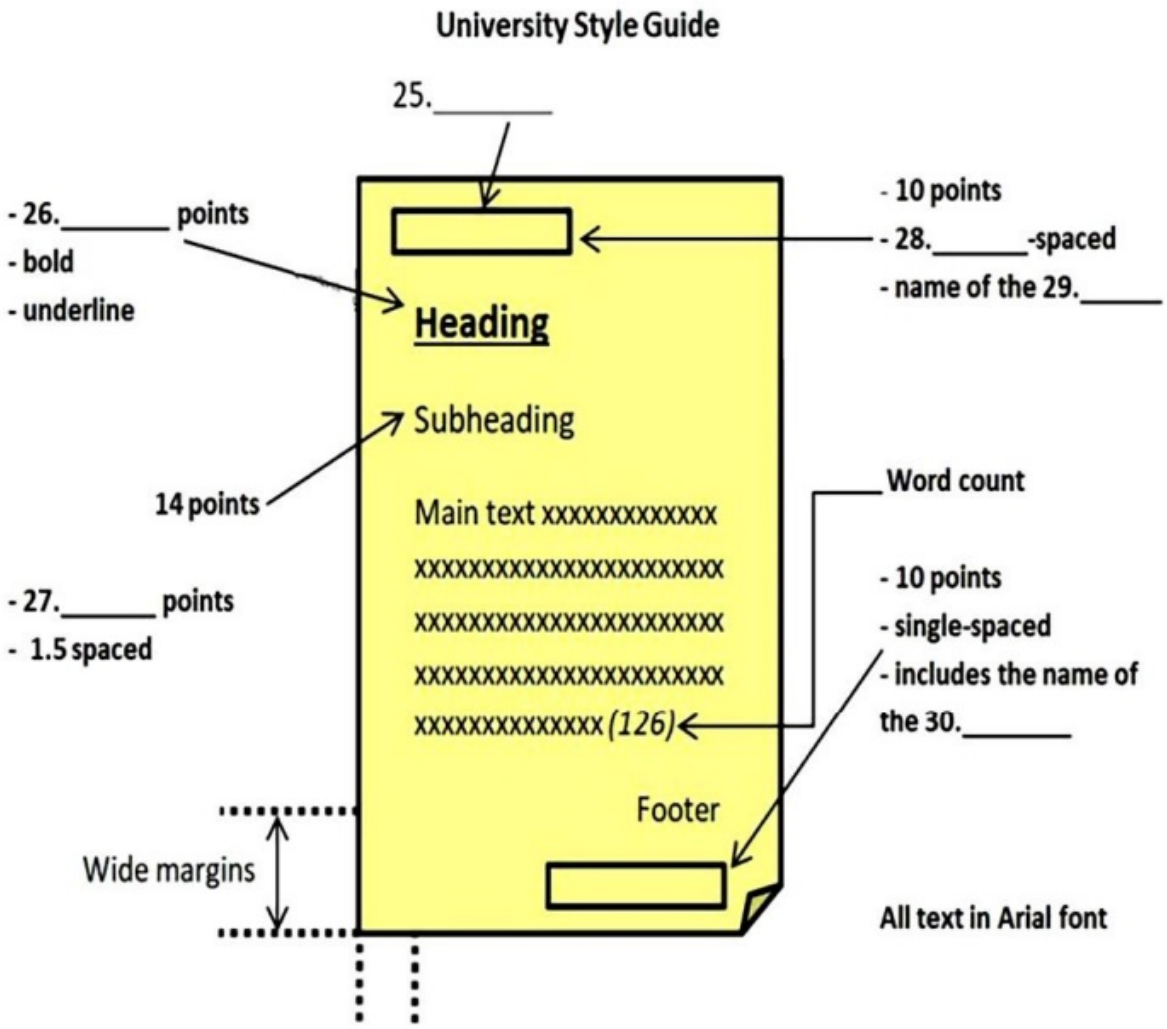

Questions 21-24

Complete the timetable. Write the correct letter, **A-H**, for each answer.

	Morning	**Afternoon**
Monday	Opening Lecture	21 [ ]
Tuesday	22 [ ]	Study Skills
Wednesday	x	23 [ ]
Thursday	x	x
Friday	x	24 [ ]

Questions 1-5

Complete the notes.

Write **NO MORE THAN TWO WORDS AND/OR NUMBERS** for each answer.

Basic Details of Project

Example **Pre-phase**	involves selecting rooms & 1 _____
Phase 1:	time needed: 3 days staff involved: Jenna, Marco, & 2 _____
Phase 2:	time needed: 3 _____ staff involved: 4 _____ , with assistance from 5 _____

Questions 6-10

Choose the correct letter, **A, B,** or **C.**

6 The main form of data collection will be

- A ○ questionnaires.
- B ○ Internet polling.
- C ○ face-to-face interviews.

7 To finish in time, the staff will have to

- A ○ work late.
- B ○ come in early.
- C ○ take some work home.

8 The final report will contain

- A ○ three appendices.
- B ○ material from the company website
- C ○ a supplementary booklet.

9 The final report will be handed in on the

A ○ 5th.

B ○ 15th.

C ○ 25th.

10 At the end, there will be

A ○ an office party.

B ○ a restaurant dinner.

C ○ presents for all involved.

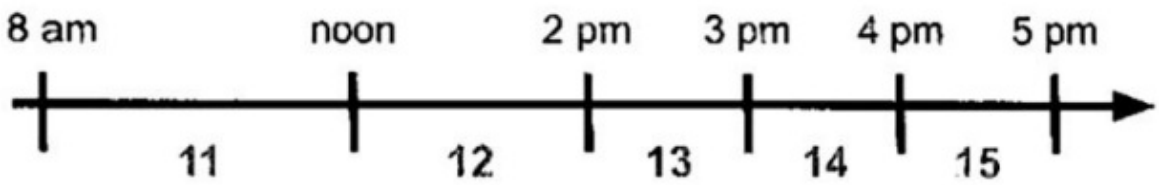

Questions 11-15

Complete the repair schedule.

Write the correct letter, **A-F**, for each answer.

	Problems to Fix
A	Birds in ceiling
B	Broken windows
C	Electrical fault
D	Fallen tree
E	Leaking roof
F	Staining on walls

Additional Details Concerning Repairs

The stained walls will be painted 16 _____

Extra paint will be left in the 17 _____

The baby birds will be given to a 18 _____

The fallen tree will be used as 19 _____

The smaller parts of the tree will be put in a 20 _____

Questions 21-26

Complete the table. Write **NO MORE THAN TWO WORDS** for each answer.

Subject	Textbook Used	Criticism of this book
Social History	21 _____	It is 22 _____
Cultural Studies	23 _____	It 24 _____
25 _____	Government in Action	It is 26 _____

Questions 27-30

Choose the correct letter, **S, C**, or **P**.

NB You may use a letter more than once.

S	Social History
C	Cultural Studies
P	Political Theory

What are the speakers' favorite subjects?

27 [ ] Steve

28 [ ] David

29 [ ] Susan

30 [ ] Olive

Questions 31-32

Choose the correct letter, **A, B,** or **C.**

31 Originally, country

- **A** ○ required fewer workers.
- **B** ○ had lots of animals.
- **C** ○ were more interesting places.

32 Now, the problems there

- **A** ○ can be solved.
- **B** ○ are numerous.
- **C** ○ are expected.

Questions 33-35

Choose **THREE** answers from the list and write the correct letter, **A-F**, next to the questions.

Which **THREE** factors are typical of modern farming?

- **A** ☐ Many overheads
- **B** ☐ More machines
- **C** ☐ Fewer types of products
- **D** ☐ More frequent feeding
- **E** ☐ Greater numbers of products
